First snowfall

In the very first snowfall of a
Winter season, snowflakes
Sparkle as they fall, crystalline
Bits of icy star fire
Sent from the galaxies
To kiss my face
On their way to earth's embrace.

PLAN TO GET YOUR FLU SHOT

Getting your flu shot helps save lives and helps our health care system by reducing the number of people who need medical care.

About the flu

- + The flu is very contagious and can spread quickly and easily.
- + Some people with the flu only get mildly ill. Others, like those over 65 years and young children, can get very sick.

Who should get the flu shot?

- + Everyone 6 months and older should get the flu shot. It's especially important for people at high risk of health complications from the flu and COVID-19, and for people who can spread the flu to them.

The flu shot is safe

- + You can't get the flu from the flu shot.
- + Serious side effects from the flu shot are very rare.

The flu shot works

- + You should get the flu shot even if you've already had the COVID-19 vaccine. The COVID-19 vaccine doesn't protect you from the flu.
- + Being protected from both the flu and COVID-19 lowers your risk of severe health complications.

To learn more visit Canada.ca/flu

STOP

THE SPREAD OF THE **FLU** AND **COVID-19**

Employing multiple public health measures at once helps protect you and your community from the flu and COVID-19.

- + Get vaccinated against both the flu and COVID-19.
- + Stay home and away from others if you feel sick.
- + Improve ventilation in indoor and shared spaces.
- + Wash your hands often with soap and water.
Use hand sanitizer if soap and water aren't available.
- + Wash your hands before touching your eyes, nose or mouth.
- + Cough and sneeze into a tissue or into the bend of your arm.
- + Clean and disinfect frequently touched surfaces and objects.

Decide whether to add other public health measures, like wearing a mask or physical distancing in public, based on:

- + levels of flu and COVID-19 in your community
- + vaccination coverage in your community
- + your personal risk and comfort levels

It's not always easy to tell the difference between flu symptoms and COVID-19 symptoms. If you have symptoms, stay away from others and follow the advice of your health care provider or local public health unit.

Help reduce the spread of respiratory viruses

Respiratory viruses increase in the fall and winter. This year, several respiratory viruses are circulating at the same time, including:

- ▶ COVID-19
- ▶ flu (influenza)
- ▶ respiratory syncytial virus (RSV)

Preventing the spread

Respiratory viruses spread in several ways. That's why using several layers of protection is the most effective way to help reduce your risk of getting and spreading viruses.

It's important to:

get your annual flu shot

stay up to date with your COVID-19 vaccinations

stay home when sick

wear a mask in public indoor settings

clean your hands often

improve indoor ventilation when possible by opening a window or door

avoid touching your face with unclean hands

cover your coughs and sneezes with a tissue or the bend of your arm

clean and disinfect high-touch surfaces and objects frequently

pay attention to public health alerts and advice in your community
