Right to Play Community Mentor

Job Description

The Eelūnaapéewi Lahkéewiit Council is currently accepting applications for a Right to Play Community Mentor within the Child and Family Services.

PARTNERSHIP BACKGROUND:

RTP's program partners with First Nations, Métis and Inuit communities and urban Indigenous organizations across Alberta, British Columbia, Saskatchewan, Labrador, Manitoba, Ontario and New Brunswick to deliver community-driven, culturally-relevant play-based programming designed to enhance leadership, self-confidence, and self-efficacy among children and youth. Guided by an Indigenous community development model, PLAY and its partners create safe and inclusive spaces where children and youth can share their ideas, their hopes and their fears, and learn the skills to become positive agents of change.

SUPERVISION:

For daily operations of the program, the coordinator will be under the direct supervision of the Child and Family Services Supervisor.

SUMMARY OF DUTIES:

In partnership with Right To Play, Promoting Life-skills in Aboriginal Youth (PLAY) the Community Mentor position will be responsible for the planning and implementation of a program geared toward children and youth. The Community Mentor will report directly to both a Community Supervisor and an assigned RTP Program Officer (as per the grant requirements).

DUTIES & RESPONSIBILITIES (INCLUDED BUT NOT BE LIMITED TO):

- The Community Mentor will plan and perform all details and logistics needed to deliver the program session, activities and events for a minimum of 10-20 children and youth.
- The Community Mentor will be responsible for learning one core program and delivering these sessions to child and youth participants.

Job Summary

- The Community Mentor will plan and host three (3) mandatory intergenerational events that will allow children, parents, and grandparents to learn and play together.
- The Community Mentor will share structural plans, successes and challenges of the PLAY program with the greater community/organization. In addition, the Community Mentor will strive to create and maintain unique partnerships to support the development and wellbeing of children and youth within the program.
- The Community Mentor will be responsible for completing a variety of administrative tasks in relation to RTP program commitments.
- Facilitate a registration process for children and youth, and provide program information to all who are interested.
- Engage youth in small group discussions to encourage them to share their ideas, and collectively assess goals and outcomes of the program.
- Attend and travel to one mandatory training (Fall) to learn how to facilitate.
- Track and report on the successes and challenges of the program.
- Provide regular phone and email updates to RTP Program Officers in regards to successes, and challenges of programs. This will include weekly phone calls with the Program Officer.
- The Community Mentor will support the Youth Council Development.

Dear Chief and Council:

Re: Water Analysis Result-Morovian of The Thames First Nation-Health Centre

Water samples taken from the Morovian Health Centre on February 13 2024 come out with sodium level 49.5mg/l. The result indicates that sodium level analysed is above 20 mg/L.

The guideline for sodium in the Guidelines for Canadian Drinking Water Quality and the standard for sodium in the Ontario Drinking Water Quality Standards is 20 mg/L for those on **sodium restricted diets** and 200 mg/L **for non-sodium restricted diets**. Sodium in drinking water is not considered to be toxic to a healthy person, however if someone is on a sodium restricted diet they should seek the advice of a physician. Please see the attached information sheet

If you have any questions or comments, please do not hesitate to contact my office at (519) 645-5886 or my cell at 519-200-5260

SODIUM IN DRINKING WATER

This fact sheet is intended to convey information about sodium levels in drinking water in Morovian Nation of Thames

The level of sodium in the Health Centre, Morovian of The Thames First Nation water system is 49.5 mg/L. The Aesthetic objective for sodium in drinking water is 200mg/L. However, when sodium levels is higher than 20mg/L local residents should be informed to help person with sodium restricted diets control their sodium intake.

This is bacteriologically safe water supply. Drinking up to two litres of water per day would contribute (49.5 mg/L x2 L) 99 milligrams of sodium to a person's diet. For healthy adults, this sodium level in drinking water *does not pose a risk*. Most adults consume 4000-5000mg of sodium per day. For people on very strict, strict or moderate sodium restricted diets, the amount of sodium in the water may be significant. (See chart below)

Your body needs sodium in order to maintain blood pressure, control fluid levels and for normal nerve and muscle function. Food or water is not the only source of sodium in our diets. Sodium also can be found in drugs such as antacids, laxatives, aspirin and cough medicines. Sodium also can be obtained from table salt. One teaspoon of table salt contains 2300mg of sodium.

Sodium Restricted Diet Summary

	Maximum intake of sodium allowed per day	Amount of sodium in 2L of water
Very strict diet	500mg/day	99 mg/day
Strict diet	1000mg/day	99 mg/day
Moderate diet	2000mg/day	99 mg/day
Mild Diet	3000mg/day	99 mg/day

If you any questions about sodium in your drinking water, please consult your physician or call your health centre at:

February 8, 2024

Dear colleagues,

I am writing to share some concerning information regarding the toxic drug supply in Ontario, and recent exposures for people who use drugs.

First, last week information was shared regarding a new drug that has been identified in the drug supply in Toronto: medetomidine/dexmedetomidine. This substance was identified in substances also containing opioids, and in some cases also containing benzodiazepines and xylazine. These substances may interact to increase the risk of harms. Exposure to medetomidine/dexmedetomidine may be associated with loss of consciousness, and potentially also cardiac and circulatory system depression and respiratory depression.

Second, since early this week there have been a substantial number of toxicity events requiring emergency medical care in Belleville within a narrow time period, leading Belleville to declare a state of emergency. The substance or substances involved in these toxicity events has not been identified yet, and these toxicity events may or may not be associated with medetomidine/dexmedetomidine. I understand that people presented clinically with decreased level of consciousness and in some cases required respiratory support, and some people showed partial response to naloxone administration. As far as I know, there have been no deaths reported in association with the toxicity events in Belleville this week.

In terms of urgent actions, we request that you share information about current risks of drug toxicity, which may be acutely increased in your jurisdiction from baseline, with appropriate stakeholders in your public health unit, including people who use drugs, emergency medical services, and community-based health and social services that work with people who use drugs. Specifically, we ask that you share messages regarding the risks of substance use, that anyone using any substance should have immediate access to naloxone, encourage people to not use drugs alone, and encourage people who use drugs to access a supervised setting such as a Consumption and Treatment Service, where available.

/2...

In addition, we recognize the key role of partnerships in preventing and responding to acute drug toxicity events. We ask that you use this opportunity to review your response plans in the event of a large drug toxicity event, including processes in place to communicate and collaborate with your community drug strategy. Please ensure your local drug strategy committee is active and meeting regularly.

Yours truly,

Quitting smoking at any age can lower the risk of lung cancer. It's always a good time to stop smoking!

Living with a serious illness?

A palliative approach to care can help improve your quality of life by:

- providing support at every stage of illness
- being available alongside other treatments for your illness
- offering grief support throughout your illness

Explore the full spectrum of palliative care

Palliative care is important, but often misunderstood. Let's explore how it can help people with serious illness live life as fully as possible.

What is palliative care?

Palliative care focuses on improving quality of life for people living with serious illness. It can benefit people:

of any age

in any setting

even while receiving other treatments

When people talk about palliative care, they usually mean **specialist palliative care** provided by a palliative care doctor, nurse, or team. But in many cases, it can be broader than that.

Palliative care can also:

be provided by a primary care team and other community members

start at diagnosis and continue throughout an illness

This is called a **palliative approach to care**. It's also known as primary- or generalist-level palliative care.

Care can range from a palliative approach to care to specialist palliative care, and can change depending on a person's needs.

most people can receive a palliative approach to care

some people need a combination of both

few people need specialist palliative care for more complex needs

The truth about palliative care

Despite what some may think, palliative care:

- is not only for when someone is dying
- is for all ages and stages of illness
- can be provided in settings like at home or in the community, including residential care facilities
- can involve doctors, nurses, social workers, counsellors and more
- is not just for treating physical symptoms
- includes emotional, psychological, social and spiritual support
- can be provided alongside other treatments
- includes grief support before and after a loss
- provides practical support for caregivers

Palliative care may be more than you think.
